NEI's Battery Materials Manufacturing Plant gets ISO 9001:2008 Quality Certifications

Somerset, NJ – NEI Corporation, a leading developer and manufacturer of new lithium-ion battery materials is proud to announce that its joint venture, United Nanotech Products Limited (UNTPL), obtained the ISO 9001:2008 quality certification. UNTPL is a custom lithium-ion battery materials manufacturing company located in Kolkata, India. The nearly 45,000 ft² facility with advanced and efficient manufacturing processes, combined with value labor from India, enables the company to be highly competitive. NEI's advanced battery materials development capability combined with UNTPL's large volume capability gives manufacturers of lithium-ion batteries the all-in-one ability to do both materials development and manufacturing.

The ISO 9000 family of standards is an international consensus of quality management standards and guidelines designed to ensure that an organization consistently delivers a product or service that meets customer and applicable regulatory requirements. These standards are outlined and based on a standardized set of requirements for a quality management system, aimed to enhance customer satisfaction. ISO 9000 also includes processes for continual improvement of the system to conform to the needs and expectations of users and the market itself.

Mr. Devashish Dabriwal, Managing Director of UNTPL, said, "UNTPL obtaining ISO9001:2008 certification assures potential customers about the quality of the manufacturing processes at the plant, and hence the quality and consistency of its products." UNTPL has already completed the scale-up process for manufacturing Lithium Titanate anode material in tonnage quantities.

About NEI Corporation

Founded in 1997, NEI Corporation is a leading lithium-ion battery material manufacturer in the US. NEI also develops nano and micron size materials for a diverse number of applications. The company's products incorporate proprietary nanotechnology and advanced materials science to create significant performance improvements in high volume manufactured goods. NEI's products include advanced protective coatings, high performance battery electrode materials, and nanomaterials for emerging markets, including heat transfer fluids. NEI has created a strong foundation in the emerging field of Nanotechnology that has enabled the company to become a leader in selected markets. The company is based in Somerset, NJ. For more information, contact NEI Corporation at (732) 868-3141 or www.neicorporation.com.

About UNTPL

Founded in 2005, UNTPL is a 50:50 joint venture company between United Credit Group based in Kolkata, India and NEI Corporation. United Credit Group is a diversified business house in areas like real estate, finance, and manufacturing for more than 30 years. The venture has set up a 45,000 ft.² state of the art manufacturing facility in the outskirts of Kolkata, India to produce electrode (cathode and anode) nanomaterials for use in lithium-ion batteries. The plant is managed and run by a highly qualified team of professionals, engineers, and scientists with experience in their respective fields.
