NEI Corporation Rolls Out Customized Li-ion Battery R&D Service

NEI Corporation, a leader in battery materials development, has announced a suite of unique R&D services to serve the growing Li-ion battery industry. The service, provided to Li-ion battery developers and users, will be exclusive and specific to each customer and tailored to their individual needs.

There are two aspects to the comprehensive service: (i) cathode and anode materials development, and (ii) electrode fabrication and cell-level testing, along with other electrochemical testing such as impedance measurements.

“Over the past two years, more and more people are approaching NEI with a variety of needs pertaining to Li-ion batteries,” said Dr. Mumu Moorthi, Vice President of Business Development at NEI Corporation. “These services from NEI will enable our customers to focus on their core effort, while NEI’s experienced scientists can take care of their R&D related work”. These R&D services, including our expert analysis of the data, will be specific to each customer and will be held confidential as required.

About NEI Corporation

NEI is a leading lithium-ion battery material developer and manufacturer in the United States. NEI also develops nano and micron-size materials for a number of other applications. The company’s products incorporate proprietary nanotechnology and advanced materials science to create significant performance improvements in high volume manufactured goods. NEI’s products include advanced protective coatings, high performance battery electrode materials, and nanomaterials for emerging markets, including heat transfer fluids. NEI has created a strong foundation in the emerging field of Nanotechnology that has enabled the company to become a leader in materials development. Established in 1997, the company has two locations in NJ. For more information, contact NEI Corporation at (732) 868-3141 or visit us at www.neicorporation.com.
