NEI Corporation introduces Nanotech Analytics, a new comprehensive advanced materials characterization and analysis service

Somerset, NJ - NEI Corporation, a leading developer and manufacturer of nanotechnology-based advanced materials, has introduced a new comprehensive materials characterization and analysis service, **Nanotech Analytics**. With the motto "You make it, we test it", this new service specializes in full service nanoscale materials characterization and consultation.

In many instances, nanoscale materials have fundamentally different characteristics than conventional microscale materials. Nanotech Analytics goes beyond just physical characterization, and assists the customer in identifying the special attributes of nanoscale materials and how to benefit from them. When appropriate, the tests are carried out under applicable industry standards, such as those from the American Society for Testing and Materials (ASTM).

Given NEI's vast experience in nanotechnology and materials synthesis, Nanotech Analytics enables the company to share its knowledge with customers through testing and analysis of its customer's materials with NEI's state of the art equipment.

"Through Nanotech Analytics, we bring to our customers over a dozen years of experience in understanding nanotechnology and nanoscale materials", says Dr. Ganesh Skandan, CEO of NEI Corporation. He added, "As the field of Nanotechnology matures, innovative companies find ways to tap into the benefits of using nanoscale materials, and NEI is proud to be supporting these companies".

A sample of the services includes:

Powder Characterization – Particle Size Analysis, BET Surface Area, X-ray Diffraction, TGA/DTA

Coating Characterization – Mar, Abrasion, Hardness, Haze, Impact Testing, Film Thickness, Hydrophobicity (Contact Angle)

Dispersion Characterization – Viscosity, Optical Transmission, Zeta Potential, Infrared Spectroscopy

About NEI Corporation

NEI Corporation develops, manufactures, and distributes nanoscale materials for a broad range of industrial customers around the world. The company's products incorporate proprietary nanotechnology and advanced Materials Science to create significant performance improvements in manufactured goods. NEI's products include advanced protective coatings, high performance battery electrode materials, and specialty nanoscale materials for diverse applications. NEI has created a strong foundation in the emerging field of Nanotechnology that has enabled the company to become a leader in selected markets. Established in 1997, the company is based in Somerset, NJ. For more information, contact NEI Corporation at (732) 868-3141 or visit www.neicorporation.com.
