**NEI Corporation to exhibit at the 29<sup>th</sup> Battery Seminar and Exhibit in Fort Lauderdale, FL on March 12-15, 2012**

Somerset, New Jersey, USA – [NEI Corporation](#) announced today that the company will showcase its products and services at Booth No. 5 at the 29<sup>th</sup> Battery Seminar and Exhibit in Fort Lauderdale, FL on March 12-15, 2012. More information on the Seminar and Exhibit can be found at [www.powersources.net](http://www.powersources.net). Both technical and business development representatives from NEI Corporation will be present at the booth to meet with current and potential customers for discussions.

**NEI Corporation** produces specialty cathode and anode materials for the battery industry. Some of the compositions have been developed in-house, while others are specified by NEI's customers. Both micron-scale and nano-scale powders can be produced by NEI's versatile manufacturing process. NEI Corporation is uniquely suited to custom develop electrode materials for battery developers and manufacturers. The cathode and anode powders can also be processed into electrode tapes, making it easy for the customers to test in different cell formats. NEI also offers half-cell and full-cell electrochemical testing services at ambient and controlled temperatures.

Dr. MuMu Moorthi, VP of Business Development at NEI Corporation said, "In the past twelve months, we have serviced the needs of over two dozen customers. We are pleased with the positive feedback from the corporations and institutions we have served." He added, "We look forward to expanding our role in the industry as a key contributor to the development of advanced batteries."

**About NEI Corporation**

Founded in 1997, NEI Corporation develops, manufactures, and distributes nanoscale materials for a broad range of industrial customers around the world. The Company's products incorporate proprietary nanotechnology and advanced materials science to create significant performance improvements in manufactured goods. NEI's products include advanced protective coatings, high performance battery electrode materials and specialty nanoscale materials for diverse applications. NEI has created a strong foundation in the emerging field of nanotechnology that has enabled the Company to become a leader in selected markets. The Company is based in Somerset, NJ.
